INTRODUCTION
Promotion and/or tenure (P&T) reviews are significant transitions in a faculty member’s career, and often the source of considerable anxiety. These guidelines are intended to decrease that anxiety by clarifying campus-level expectations and processes. Criteria for P&T for faculty and for librarians are outlined in the *Indiana University Academic Handbook*. These University criteria for faculty and librarians are interpreted in each Indiana University-Purdue University Indianapolis (IUPUI) school and department according to their respective disciplinary cultures. Those interpretations are defined in school-level and department-level guidelines. More specific criteria relating to librarians are contained in the *Library Faculty Handbook*.

The principles that shape this document are as follows:

- The Dean of the Faculties’ Guidelines interpret University policy and criteria to assist in the preparation of P&T dossiers. The guidelines should prove useful in:
  - helping faculty, chairs, and deans understand their role and responsibilities in the P&T process;
  - ensuring that dossier evaluators on all review committees have the information they need to make judgments about individuals within a common, shared context reflective of campus expectations and University requirements.

- These guidelines apply to the following appointees:
  - faculty and librarians at IUPUI who are subject to P&T consideration, including all tenure-related appointees, clinical faculty, research faculty, and lecturers, whether full-time, part-time, volunteer or adjunct.
  - faculty who hold appointments in Purdue schools at IUPUI, faculty based at medical centers, faculty based at IUPUC, and some faculty in other units for whom the primary place of work may not be Indianapolis.

- The guidelines are updated annually based on recommendations from the campus-level P&T committee and members of the Faculty Council Executive Committee. Changes respond to the evolving nature of the institution as well as the experience of the campus level reviewers, who often identify better ways of assisting faculty to prepare their dossiers for these important deliberations. In accordance with the *Indiana University Academic Handbook* (p. 66), tenure is based upon the guidelines in effect and agreed to at the time of the appointment. Promotion to full rank is based on contemporary guidelines in effect at the time of application for promotion.

- Each school and library must have a document that states with reasonable specificity the standards that will be used to evaluate whether or not candidates meet the criteria for promotion and/or tenure.

- In accordance with school policies, departments or divisions should also have such documents.

- School, library, and department documents must comply with the criteria of the University and IUPUI. A current copy must be on file with the Dean of the Faculties through the Office of Faculty Appointments and Advancement (FAA). These documents need to be approved by your school’s appropriate faculty governance process.

- P&T considerations are based on the missions and the contexts of each candidate’s department and school, in compliance with the IUPUI mission, as defined in each department’s and school’s statement of criteria and standards.

DISTINCTIONS BETWEEN PROMOTION AND TENURE
These guidelines should be used in preparing dossiers for promotion and/or tenure. The criteria for P&T are closely related, but not identical. While both are based on performance commensurate with rank, tenure requires documented evidence of the promise of continued achievement with distinction. While P&T recommendations are made separately, most tenure-probationary faculty are considered for both at the same time (unless they already hold a rank of associate or full professor), and, generally, a decision to award tenure is not made without simultaneous promotion in rank. In rare circumstances, however, decisions regarding P&T may be made separately.

Tenure
The *Indiana University Academic Handbook* statement on tenure emphasizes an implicit reciprocal commitment between tenured faculty members and the University. The University provides academic freedom and economic security; faculty members maintain high standards of excellence in their work. The University works to ensure safeguards to academic freedom through employment security, while the faculty member or librarian works to
fulfill the commitment demonstrated during the probationary period with respect to continued growth and productivity.

- Tenure is based on a documented record of achievement that meets defined standards for the department, school, and campus, together with evidence and a plan that demonstrates that the level of achievement is likely to continue and grow. Tenure acknowledges achievement in light of its promise for the future.
- Tenure is local (i.e., campus specific), and faculty who have tenure are expected to contribute in concrete, demonstrable ways to the continued development of IUPUI as an academic community.
- Tenure is awarded at the campus level, not at the department or school level, even though tenure is specific to a unit.
- The safeguards of tenure are preserved at the campus level, and tenured faculty members thus accept a responsibility to the campus as well as towards the University.
- Some faculty members—most notably those in the School of Medicine—may be assigned to other campuses, yet their tenure is sited at IUPUI. Due to the unique mission of such programs, faculty members maintain their academic community through their association with the IUPUI campus and are subject to the policies and procedures of the IUPUI campus even if the principal site of their work is elsewhere.
- Tenure is the occasion to renew a personal commitment to achieve the promise of the probationary period and to accept the responsibility of membership in the academic community of IUPUI.

Promotion
As faculty compile records of sustained achievement in their respective fields of work, their accomplishments and level of expertise deserve recognition through promotion at key intervals.

- Promotion is recognition of achievement.
- For probationary tenure-track faculty and librarians, promotion to the associate level is normally sought toward the end of the probationary period in conjunction with the tenure decision.
- Both tenure-track and non-tenure track faculty may seek promotion in rank when their achievements warrant this recognition. The Indiana University Academic Handbook defines the standards for each rank, and each department and/or school interprets those standards in relation to the disciplinary culture.

ADVICE REGARDING PREPARING FOR PROMOTION AND/OR TENURE
Preparation for P&T begins in the first year at IUPUI. Consult both the IUPUI Dean of the Faculties’ Guidelines as well as those for your department and/or school. Faculty, chairs, deans, the Dean of the Faculties, and FAA all have distinct and significant roles and responsibilities in the P&T process.

Faculty Responsibilities and Recommended Timeline
This timeline is based on the most common cycle of preparing dossiers for a promotion and tenure review in the sixth year, and may be modified following Indiana University policies and individual candidates’ circumstances. However, much of the advice is applicable to faculty and librarians in all tracks and ranks.

Year 1 and 2:
- Create a collection system for evidence of activities in teaching (performance in the case of librarians), research and creative activity, and service. Collect and organize everything, ranging from syllabi to grant applications (whether successful or not) to results of committee work. In addition to being useful for annual reports, these early materials provide a basis for analysis of improvement.
- Preferably with the advice of the chair, identify a mentor who can guide you through the processes leading to P&T, and orient you to departmental expectations. Ideally, this person should be at the rank of associate or full professor.
- Collect, summarize, and analyze student evaluations every year. Areas where students indicate a problem provide excellent opportunities to document improvement from one semester to the next.
- Arrange peer reviews of your teaching. Problems that are identified in the review process provide excellent opportunities to document improvement from one peer review to the next.
- Identify your area of excellence, bearing in mind that for P&T reviews you must also document at least satisfactory progress in the other areas and bearing in mind that each department/unit has defined its expectations about an appropriate area of excellence.
• Be sure you know the expectations of your department and school related to grant/contract funding and make sure that your work falls within those guidelines. The Office of Research Development provides helpful workshops and other research support for faculty. These resources can be found at http://research.iupui.edu/.

• Scholarly dissemination of your work is required. Be sure you know the expectations of your department and school related to scholarly productivity and make sure that your work falls within those guidelines. Continue to systematically work on your scholarship output.

• In consultation with your mentor, become familiar with campus resources available in the Center for Teaching and Learning (CTL), the Center for Research and Learning (CRL), and the Center for Service and Learning (CSL). Take full advantage of the wide range of support available to faculty.

• Become familiar with the University, campus, school/unit, and department guidelines for P&T. Attend department and/or school/unit P&T workshops as well as the annual campus P&T workshop in March. Additionally, the Office for Women offers annual P&T workshops that are open to all faculty at any stage of their academic career.

• Prepare for the three-year review.

Year 3:
• This year the three-year review will provide an opportunity for faculty, departments, and schools/units to take stock of the progress of tenure-probationary faculty toward P&T.
• Continue all the above activities while you begin to analyze and document progress on your work in terms of improvement and achievement in relation to department criteria/school criteria. University criteria, and the Dean of the Faculties’ Guidelines.
• Your personal statement for the three-year review also provides an opportunity to reflect not only on your work, but also on the focus that is emerging in your work. This focus will provide the coherence to your work that should shape your efforts between now and the time of your candidacy for P&T.
• Analyze teaching evaluations to identify key themes and how they point to teaching achievements or areas for further attention. If data are available, present your performance in relation to peer average scores.
• Analyze peer reviews to determine again how you might improve student learning in your classes.
• Analyze your grant and scholarly dissemination record in relation to department norms and expectations.
• You will receive feedback on your three-year review from your primary committee, your chair, and your dean. Incorporate that advice into a plan to present a compelling case for P&T in your sixth year. Follow the advice you are given. Work closely with your mentor and your chair, and seek out appropriate supports at the campus level in developing your plan.
• If there are significant issues identified in the three-year review, ask for a fourth-year review for further guidance and to update your plan.

Year 4:
• This is the year to ensure that you are on track with grants and sufficient dissemination of your scholarship as defined by your department. Maintain close contact with your chair and your mentor to identify areas of support to help you progress along that track.
• Arrange for another peer review of your teaching. You might consider inviting someone external to your department in order to gain additional perspective.
• Address any problems identified in the three-year review.

Year 5:
• This is the year you begin to prepare your dossier. If you have kept records from the start of your academic career, you should be in excellent shape to analyze your progress and to present your case.
• Be sure to attend the workshops on P&T this year in your department and school as well as at the campus level. Your perceptions and understanding will be different from what they were your first year at IUPUI, and your needs more focused, so you will probably get much more immediately useful information at these workshops.
• Aim to complete your dossier a month or two before it is due, especially your Candidate’s Statement, so that your mentor and other colleagues can provide you with helpful feedback.
• If you have identified an area of excellence, be sure that your dossier not only makes your case for excellence in your chosen area, but also provides substantive evidence for at least satisfactory performance in the other two areas.

• Your dossier will be due in your department either at the end of this academic year or at the beginning of your sixth academic year. This varies from department to department, so make sure that you know the timeline.

• Make sure you complete and sign the Routing and Action Form (see Appendices).

Year 6:
• Take a breather, and then begin your next phase of scholarly work.
• You will be notified at each stage of your dossier’s consideration.
• Be familiar with your options if you have concerns about the evaluation of your dossier at any stage. These policies and procedures are outlined in the Indiana University Academic Handbook.

Chair (or Chair Designee) Responsibilities and Recommended Timeline
(In bi-campus or multi-campus schools, the associate dean responsible for the program at IUPUI may fulfill this role.)

While candidates are responsible for documenting that they have met the standards and expectations for P&T, the chair is responsible for providing support and guidance throughout the process, and for administrative and procedural tasks. In general, chairs need to:

• Ensure the most current written description of the department’s expectations for excellence in each area (teaching [performance for librarians], research and creative activity [performance for artists], and service) for tenure or promotion to associate professor and full professor is on file with the Dean of the Faculties through FAA. These documents need to be approved by your school’s appropriate faculty governance process.

• Develop a system of departmental peer review of teaching that ensures each new faculty member has several opportunities for peer review prior to their candidacy for P&T.

• Provide candid advice throughout the probationary period and assist the candidate in organizing the materials needed for the dossier.

Year 1 and 2 of faculty appointment:
• Ensure that each new faculty member has a mentor who is tenured and at a rank higher than the new faculty member, if possible.

• Meet individually with each new faculty member to inform him or her about departmental expectations for P&T. Provide new faculty members with a copy of the departmental expectations.

• Ensure that each new faculty member is invited to either the department and/or school P&T workshop, and encourage attendance at campus-level P&T workshops.

• Encourage new faculty to become acquainted with the CTL, CRL, CSL, and the Office of Research Development.

• Provide guidance for faculty annual reporting procedures.

• Provide a written annual review that addresses frankly the faculty member’s strengths and weaknesses, with suggestions about how to address the weaknesses.

• Provide guidance for the faculty member to select an area of excellence appropriate to the department’s expectations.

Year 3 of faculty appointment:
• Ensure that each tenure-probationary faculty member understands the function of the three-year review.

• Ensure that the three-year review is carried out following IUPUI Faculty Council policy and procedures (as applied by particular requirements of the department or school/unit).

• Ensure that faculty being reviewed receive a written assessment of their progress toward P&T, with specific guidance about any issues or concerns that require attention.

• Ensure that the declared area of excellence is addressed and that the faculty member is documenting at least satisfactory performance in the other areas.
• Ensure that the three-year review is in the office of the Assistant Dean of the Faculties for FAA by the due date (generally the middle of May).
• If the faculty member’s three-year review revealed significant issues, encourage the candidate to seek a fourth-year review or conduct one if required by current school policies.

Year 4 of faculty appointment:
• Ensure that the faculty member has access to the resources necessary to address any concerns raised in the three-year review.
• If requested by the faculty member or required in current school policies when a faculty member’s three-year review revealed significant issues, conduct a fourth-year review.
• Monitor progress toward P&T.

Year 5 of faculty appointment:
• Ensure that the candidate has documented not only excellence in one or more areas but also satisfactory performance in the other areas.
• Develop a list of external and internal peer reviewers for each candidate in accordance with the directions set out by the Dean of the Faculties in the section on External Assessment.
• Excellence in teaching or professional service requires similar peer review by persons outside the local context who can place the individual’s accomplishment within the larger academic and disciplinary context. The same expectations of rigorous peer review by qualified faculty apply to teaching, professional service, research and creative activity. Department chairs should give special attention to identifying external evaluators who can assess the results of an individual’s activities in teaching or service.
• If potential referees of some candidates are screened to find out if they would provide a letter if asked, then this same process must be applied to all candidates. Special care must be given to assure that the external reviewers are at “arm’s length” or independent as described in the section on External Assessment. Chairs should aim to receive no fewer than six and usually not more than ten letters. All solicited external letters received must be included in the dossier whether or not they exceed the suggested maximum of ten.
• Provide external reviewers with the appropriate materials to make informed judgments.
  o While school or department policies may detail particular kinds of evidence that should be sent to reviewers (often the C.V., the candidate’s statement, and selected publications), the basic goal is to match evidence to criteria. For example, if the candidate is presenting excellence in teaching then teaching products, such as syllabi or course materials produced by the instructor, should be provided to the reviewer. If the candidate has named service as an area of excellence, documents or products detailing the intellectual work related to service and its impact should be sent to the reviewers.
  o Occasionally, a candidate decides to change the area of excellence after external reviews have already been solicited. In these cases, reviewers should be notified of the change and provided supplementary evidence, if needed. All communications should come from the official requesting party, in most cases, the dean or chair.
  o Candidates should be instructed that they are not to contact external reviewers.
• Make the department protocol for soliciting letters from external peer reviewers available to the candidate. The departmental (or school) protocol for soliciting external letters should be written and should be incorporated into department (or school) procedures.
• Solicit letters from peer reviewers external to the department and/or external to IUPUI using the standard protocol and template. The template for letters in the Appendices of this document differentiates advancement on the basis of teaching, research or creative activity, and service; references the rank and expectations for that rank; and allows chairs to delineate any particular contextual circumstances or expectations for the candidate. These distinctions give reviewers the information they need to provide helpful reviews. (Further tips on soliciting external letters are included in the Appendices.) Similar letters adapted for peers internal to IUPUI should also be used. Advice on the solicitation of external letters for librarians can be found in the Library Faculty document “Letters in P&T Dossiers FAQs”.
• For a faculty member working in an interdisciplinary area relevant to the department’s mission, but sufficiently removed from the faculty’s ordinary expertise or familiarity as to require an unusual procedure, establish a special primary committee including members from outside the department. Such a committee
should be composed in consultation with the duly constituted primary committee and should be used only with the consent of the candidate. If a candidate wishes to accept peer review at the primary level by the established committee, this wish must be honored.

- If the department does not have faculty at or above the rank sought by the faculty member, establish a special primary committee that may include members from outside the department or school. Such a committee should be composed in consultation with the duly constituted primary committee.
- Clinical track faculty cannot serve on P & T review committees for tenure track faculty. Those voting for a promotion must at least hold the rank being sought by the candidate. Those voting for tenure must hold tenure.

Year 6 of faculty appointment:

- Oversee the timeliness and procedural integrity of the primary committee.
- Compose a letter of evaluation of the candidate’s case and recommendation for action and enclose this in the dossier. Include the following:
  - supporting evidence of the candidate’s institutional citizenship, including specific contributions and outcomes of committee membership or campus initiatives that extend beyond mere membership and attendance.
  - an analysis of the stature of journals, presses, editions, galleries, and other means of disseminating the results of the teaching, research and creative activity, or professional service of the candidates, including the quality of electronic publications. This assessment is required. Stature may be reflected by acceptance rates, the nature of peer review, or other measures and, whenever possible, these indices should be cited. Although the notation for each journal or other entity should be brief (ordinarily two or three sentences), special commentary may be required when faculty are working in interdisciplinary or cross-disciplinary areas. Additionally, journals devoted to practice as well as theory development in teaching and professional service may not be as widely known or understood, even by colleagues within the same department, compared to scholarly journals. Special care should be taken in assessing the stature of such journals or presses. In recent years, electronic journals have emerged in some fields that may contain material that is comparable in quality and stature to print media. If there is any question about the quality of electronic publications, the chair should address this issue explicitly. In circumstances where publication occurs outside the usual disciplinary journals or presses, chairs may wish to seek an assessment of the stature of these publications from chairs or deans in other disciplines. In order to promote and encourage interdisciplinary teaching, research and creative activity, and service, IUPUI encourages dissemination of results in appropriate media of high quality even when these outlets are unusual for the discipline. Peer review of the material, therefore, is especially important. Whenever a chair is not the appropriate administrative officer to provide an assessment of the media of dissemination, deans should arrange to include this information.
  - indications of professional or disciplinary benchmarks used in the field and relevant to the recommendations being made by the primary committee and the chair.
  - relationship of candidate’s evidence of achievement, such as student evaluations or publications, to departmental norms and expectations.
  - a brief statement addressing the expertise of each external reviewer.
- If the candidate holds a joint or adjunct appointment in another school/unit and that joint appointment represents a significant investment of the faculty member or librarian’s intellectual activities, include at least a letter of recommendation from the appropriate chair, director, or dean of that school/unit.
- Ensure that all external reviewers meet the guidelines for independence outlined in the section on External Assessment. If not, then secure additional external reviews sufficient to meet the six reviewer minimum standard prior to forwarding the dossier to the unit committee. All reviews received must be retained in the dossier.
- Ensure that candidates receive fair and equitable treatment from the primary committee.
- Ensure that reasons are provided for any negative votes from the primary committee in their final report. Chairs must ensure that primary committees do not submit minority reports.
- Before submitting to the next level:
  - Ensure that all dossiers are complete and in proper format/order.
  - Ensure that the Candidate has signed the Routing and Action Form (see Appendices).
Ensure that primary committee votes are recorded properly and you have recorded your conclusion by initialing approval or disapproval under Chair’s recommendation on the Routing and Action Form (see Appendices).

Send a letter to the candidate announcing the results of the primary committee deliberation and the chair’s decision, including the recommendations.

Facilitate exchanges between the unit committee and the primary committee that might be necessary during the unit committee’s deliberations.

Dean (and Libraries Personnel Officer) Responsibilities

- Ensure that all tenure-probationary faculty and all faculty eligible for promotion have information about P&T workshops.
- Ensure that a current copy of the school’s/unit’s document on P&T is on file with the Dean of the Faculties through FAA and that every new faculty member receives a copy.
- Arrange to include an assessment of the quality of the media used to disseminate a candidate’s scholarly work when a department is not the administrative unit.
- Ensure that candidates are informed of any materials added or changes made; candidates and all previous reviewers must be provided an opportunity to comment on or to respond to such additions. The added information and the responses will then become a part of the dossier.
- Ensure that all external reviewers meet the guidelines for independence outlined in the section on External Assessment. If not, then secure additional external reviews sufficient to meet the six review minimum standard prior to forwarding the dossier to the Dean of the Faculties through FAA. All reviews received must be retained in the dossier.
- When divergent evaluations of a dossier result in different recommendations on tenure, the unit committee may wish to consult with the primary committee and/or department chair. The dean should ensure that such consultation, when necessary, has occurred before the dean considers a case. The consultation should note the relative importance of criteria, principles, or evidence used in the evaluation that led to the contrary recommendation. The consultation must be noted in the unit committee's report, including notice of whether or not the vote of a committee was changed as a result. When there are divergent evaluations with respect to promotion, the unit committee should provide feedback to the primary committee. The report from each committee should include reasons for negative votes.
- As noted earlier with regard to the chair’s responsibility, deans must similarly ensure that unit committees do not submit minority reports. Only the final vote of committees and administrators should be recorded on the Routing and Action Form (see Appendices).
- Following review at the school/unit level, compose a letter of evaluation of the candidate’s case and recommendation for action and enclose this in the dossier.
- Include a perspective for campus and University reviewers on standards that candidates must meet in the school/unit.
- Before submitting to the next level:
  - Ensure that all dossiers are complete and in proper format/order. The dossier checklist (see Appendices) should assist with this task. Properly completing this step will prevent dossiers from being returned for correction (see Returned Dossiers). Please contact FAA if you need assistance with this step.
  - If not signed earlier, sign off on the checklist (see Appendices) attesting to the state of the dossier.
  - Ensure that all committee votes and the chair’s recommendation have been recorded properly on the Routing and Action Form (see Appendices).
  - Record your conclusion by initialing approval or disapproval under Dean’s recommendation on the Routing and Action Form (see Appendices).
- Send a letter to the candidate announcing the results of the school-/unit-level deliberation, including the recommendations themselves.

DOSSIER FORMAT

The dossier presents the evidence upon which P&T decisions are to be made. Dossiers should be no more than 50 pages (excluding the candidate’s vitae; external letters; and chair, dean, and committee letters).

The same dossier format is to be used whether the candidate is being reviewed for promotion, tenure or both.
Each of the seven sections of the dossier should be separated, labeled, and stapled with the entire dossier placed into a single file folder labeled with the candidate’s full name and school. Three-ring binders may be used only for supplementary materials retained by the school/unit. Binders and Appendices should not be forwarded for the campus-level review unless specifically requested. The school/unit must submit the original along with two copies to the Dean of the Faculties through FAA.

All dossiers for faculty and librarians should be divided into the following sections:

I. General Summary
II. Candidate’s statement
III. Documentation of Teaching and Teaching Scholarship (For Librarians: Performance)
IV. Documentation of Research and Creative Activity (For Librarians: Professional Development)
V. Documentation of Professional and University Service (For Librarians: Service)
VI. Curriculum Vitae
VII. Appendices

SECTION I: General Summary

- Section I is the only section of the dossier not prepared by the candidate. The candidate owns the dossier; therefore any substantive changes in the dossier must be reviewed by the candidate. However, certain materials are added to the dossier by others. Before the review process begins, for example, outside letters will ordinarily be added by the department or school/unit person designated to collect them. Unless explicitly protected by the candidate's having waived a right to access, anything included in the dossier must be accessible to the candidate.

- Beginning with primary committee reviews, evaluative reports will be added to the dossier by each committee or administrator. Copies of the evaluative reports are to be sent to the candidate as the dossier is forwarded. The cumulative evaluations become part of the dossier.

- The candidate is not expected to respond to or comment on these evaluative reports. However, if other materials are introduced into the dossier and considered by one of the levels of review, then all previous reviewers, as well as the candidate, must receive copies. Earlier reviewers need not take any action as a consequence, but they must have an opportunity to reconsider their recommendations.

- The dean is expected to certify that the above condition has been met.

- Annual and three-year reviews will not be part of the dossier, but may be consulted by any of the reviewing bodies without violating the obligation to notify the candidate or earlier reviewers.

Materials Provided by Initiating Unit: The initiating unit should ensure that the dossier includes the following:

- Completed Checklist (see Appendices).
- Routing and Action Form (see Appendices).
- The written recommendation of the primary committee, including the committee's evaluation of the faculty member's teaching, research and creative activity, and service or the librarian's performance, professional development, and service. These areas should be evaluated in terms of excellent, highly satisfactory, satisfactory, or unsatisfactory. In the case of tenure recommendations, the statement should include an evaluation of the likelihood that the candidate will continue his or her activity in these three areas based on past performance and future plans. This evaluation should be signed and dated.

- The chair's individual recommendation regarding promotion and/or tenure —and a summary evaluation of the teaching, research and creative activity, and service in relation to departmental norms and expectations.

- External evaluations from persons contacted by the primary committee chair, department chair, unit committee chair, dean, or designee.

- A brief (two or three sentence) statement of the expertise of each external letter writer must be provided by the department chair (or the dean if she or he solicits the letters); these statements may be collected on a single sheet. Please do not include CVs of external reviewers. If the letter writer is acquainted with the candidate personally, the nature of their professional relationship and work together should be noted and explained. Letters should be separated into categories, e.g.:
  - external and independent referees
Materials Added at the School/Unit Level. The dean of the school/unit is responsible for adding the following to the dossier:

- The school/unit committee's written recommendation and the Committee's evaluation of the faculty member's teaching, research and creative activity, and service or librarian's performance, professional development and service.
- The dean's recommendation regarding promotion and/or tenure and a summary evaluation of the candidate's professional activities (including performance and professional development for librarians).
- If the candidate holds an adjunct appointment in another school/unit, the dean of that school/unit or an appropriate representative must be given the opportunity to provide a letter with his or her recommendation on the candidate.
- If the candidate holds a joint appointment in two schools/units, one school/unit will be designated as the primary unit in the letter of appointment (if the appointment letter does not designate a primary unit, the decision about which school/unit will be considered the primary unit for P&T must be made prior to the dossier being assembled). The P&T committees in both schools/units and departments may be given an opportunity to conduct a full review of the candidate, with the understanding that the input of the secondary school/unit becomes part of the deliberations of the primary school/unit. In the case of all joint appointments, the dean of the secondary school/unit should provide a letter for the dossier, perhaps in consultation with the P&T committee of the primary school/unit.

SECTION II: Candidate's Statement

- Candidates for promotion and/or tenure should prepare a maximum of 5 single-spaced pages for their candidate's statement that reflects their own assessments of their accomplishments in teaching, research and creative activity, and service (for faculty) or performance, professional development, and service (for librarians). Prospects for continued development in these areas must be addressed. Up to an additional two single-spaced pages, addressing the area of excellence, may be presented as a section introduction. In cases where the candidate undergoes unit-level review at another campus (e.g., Business, Education), an accommodation with the page-length expectations of those campuses may be needed.
- Candidates for promotion should focus on their designated areas of excellence and satisfactory performance; in the case of research faculty and scientists and scholars, on research and service (if service is expected by their unit); for clinical faculty and lecturers, on teaching and service.
- The Candidate's Statement is a place for reflective commentary focused on the criteria for P&T.
- The Candidate's Statement should address the interrelated aspects of a whole, integrated career. Few faculty and librarians make sharp distinctions among the various aspects of their work as they do it, and the statement should indicate how the candidate views the integration of these aspects, even while assessing achievements in each. Special attention should be given to faculty and librarian work that cuts across specializations and disciplines and that helps integrate and apply knowledge to broad patterns of intellectual activity.
- Faculty engaged in interdisciplinary work should make every effort to represent their contribution to collaborative scholarship clearly as well as the significance and value of any interdisciplinary approach they are pursuing.
- Faculty and librarians should be careful to provide clear and sufficient information about their individual roles in collaborative projects, publications, presentation, or grants.
- Candidates should explain how their service has contributed to the common good of the campus and University and how these contributions reflect department and school/unit expectations.
- Candidates should especially address their own assessment of the impact, significance or value of their work to their discipline or profession, to the unit and campus, and to society as a whole.
- Candidates should also indicate the prospects for continued personal development in their defined areas of professional activity.
Whenever possible, tenure-track faculty members should state specific plans for a research or creative activity agenda, for a plan to enhance teaching effectiveness, and for continued participation through professional service in their profession, the campus, and a community.

Faculty in non-tenure track appointments should focus on their respective areas of performance.

Similarly, librarians should indicate the prospects for maintaining excellent performance and for continuing to contribute to their profession through their engagement in professional development and service activities.

Faculty who seek advancement based on excellence in professional service should be able to demonstrate that such service is, in fact, academic work, which has significant results that have been communicated or disseminated in such a manner as to be reviewed by peers. The application of criteria to professional service should be clear, and professional service must be clearly related to the mission of the University, campus, and school/unit.

The candidate’s case for excellence should be made in relation to department, school/unit, and University criteria.

SECTION III: Teaching and Performance

Faculty: Documenting Teaching

IUPUI requires documented evidence of at least satisfactory teaching by each faculty member for tenure and for advancement in rank (with the exception of those classified as research faculty, scientists and scholars).

This section generally consists of supporting documentation related to teaching and, if this is the area of excellence, a Statement of Teaching (a narrative that is a maximum of 2 single-spaced pages analyzing the teaching area). Candidates should provide the following evidence to document teaching and advising in Section III. They should feel free to address other points not identified below:

- Evidence of the quality of teaching and advising as evaluated by peers (required for satisfactory level or higher).
  - Peer review of teaching is as important as peer review of research and creative activity.
  - Local disciplinary peers can provide essential information and assessment based on observation of the classroom, studio, laboratory, or other learning environments, including those based on technology. Additionally, local peers outside the discipline can provide an additional perspective of excellence in teaching, including practices in the classroom, teaching materials, and the scholarship of teaching and learning.
  - Peer review of classroom instruction is most effective when it is based on multiple visits to classes and examination of materials; isolated observations are rarely helpful.
  - It is much more difficult for external peers (i.e., external to IUPUI) to observe actual teaching, and thus local peers should prepare reports sufficiently descriptive to be useful to external peers along with other documented results of effectiveness.
  - Evidence in the dossier should summarize statements, checklists, and methods used by peers to comment upon the quality of classroom performance and the quality of course design as evident in the syllabus and other course materials reviewed by colleagues. Similar statement or summary evidence of instruments may be submitted to document impact on student learning based on peer review of such indicators as student work (papers and projects), performance on standard exams, or personal experience with students in subsequent courses or institutions of higher learning. This evidence from peers may have resulted from in-person review or from review of materials in print or electronic form by those at a distance who teach in similar fields or use similar methods.

- Evidence of quality of teaching, advising, or mentoring as evaluated by students (required for satisfactory level or better).
  - Such assessments are most effective when conducted over a period of years and compared to other faculty in the school/unit.
  - Only summaries should be included in dossiers. The summary should include (in grid format if possible) results by course, year and item to establish trend lines where applicable.
  - The summary should discuss individual results within the context of the department or school/unit to enhance the usefulness of the information to outside readers. When norms are available for comparison to others in the program, school/unit, campus, or discipline, these should be included. When results of scaled questionnaires are used, the values of the numeric ratings should be stated.
• Evidence of effective teaching through scholarly dissemination of knowledge about teaching, especially in peer-reviewed media, is required for documenting teaching at the level of excellence.
  o Such activities, while listed on the curriculum vitae, should also be documented and discussed in this section.
  o Tenure-track faculty seeking advancement based on excellence in teaching should have peer-reviewed publications that document student accomplishment or contribute to the theoretical base of knowledge about curriculum or effective teaching and learning.
  o In some instances, and particularly for the lecturer and clinical ranks, publication may not be the most effective or feasible means of disseminating the results of effective teaching practices or pedagogical research. When other forms of disseminating results are more appropriate, this fact should be explained and those evaluating the candidate’s work at the primary, unit, and campus levels should consider this alternative form of dissemination. Candidates and department chairs (or deans) may wish to take special care in explaining why alternative forms of dissemination may better fit with standards in the field.
• Evidence that courses taught contribute to the overall student learning outcomes specified by the unit and evidence that students have met or exceeded course or curricular learning objectives should be provided.
  o The role of the faculty member in assisting students to meet learning objectives should be documented and assessed in ways appropriate to the discipline and to the mission of the unit.
  o This may be captured through peer review or through systematic assessment of student achievement or from standardized, nationally-normed profession-related tests.
  o Faculty who teach undergraduate students should also address how their courses and scholarship of teaching contribute to learning outcomes specified by their academic unit and the Principles of Undergraduate Learning (PULs) in the statement they submit for this section.
  o At the graduate and graduate professional levels, comparable assessment measures for student learning should be developed if they do not yet exist.
• Evidence of undergraduate or graduate research and effective mentor relationships with students leading to documented learning outcomes should be provided when applicable.
  o This evidence can be provided by listing co-authored papers or joint conference publications with students on the curriculum vitae or by discussing the nature of the student outcomes in the statement for this section.
• Evidence of the nature and quality of course and curriculum development and implementation to enhance the quality, effectiveness and efficiency of teaching is expected.
  o Faculty who are using technology, problem-based learning, service learning, multicultural learning, study abroad, or other special approaches and tools to enhance student learning are especially encouraged to present these aspects of course design (even experimental use), and how they conform to or extend principles of good practice.
  o Course and curriculum development and implementation activities not reported in the candidate’s statement or in the curriculum vitae may be included in this section.
  o Evidence about student learning associated with these activities can be part of the peer review or student evaluation evidence, especially when reviewers have been asked to comment on these specific innovations.
  o Improvement in teaching for probationary faculty can be compelling when documentation demonstrates that the improvements can be sustained.
• The number of student graduate committees the candidate has served on or chaired and the evidence of the quality of results as documented by student achievements should be provided, as appropriate.
• Local, regional, national, or international teaching, advising or mentoring awards, including information about their nature and significance (e.g., criteria, competitiveness, pool of applicants, number awarded) should be listed. These can be listed on the curriculum vitae, but if explanatory details are needed, they may be included in this section.
• Teaching or advising grants (including training grants) received and their outcomes should be included. These can be listed on the curriculum vitae with outcomes information included in the statement for this section.
• Leadership roles in professional associations in organizing conferences, in presenting papers at conferences related to teaching, advising or mentoring, and in advancing other aspects of teaching should be included.
  o While these can be listed as professional service on the curriculum vitae, they may be included in the statement for this section if explanatory details are needed to support the candidate’s case.

• Information on the teaching load of the candidate should be reported.
  o While the teaching load is reported on the curriculum vitae, an indication of whether it is greater or less than the average teaching load in the department should be reported in this section.
  o A large number of students is not per se evidence of achievement; teaching and student learning must be evaluated.
  o Similarly, teaching a small number of students does not indicate diminished achievement if the teaching load is appropriate and there is a sufficient threshold for evaluating the quality of the teaching.
  o Faculty may hold part-time appointments at any rank and in any classification; the expectations and measures for teaching achievement should be proportionate.

• Using technology, distributed education, problem-based learning, community-based learning, international videoconferencing, or other new techniques and tools to enhance student learning.
  o Faculty are encouraged to report their experiments and to document results.

• Interdisciplinary work
  o Faculty engaged in interdisciplinary teaching are encouraged to describe the significance and impact of bringing multiple disciplinary approaches to their area of interest.

• Retention
  o Since retention of students is of considerable importance to IUPUI, faculty members involved in retention efforts should include a description of these activities.
  o Include any evidence that indicates the impact these activities have had on increasing retention, either in their own classrooms or in a broader school/unit or campus setting.

Librarians: Documenting Performance
• A written description of the impact of performance activities is expected.
• A summary of the candidates’ annual review statements in the area of performance is recommended.
• Candidates for promotion to librarian should also have letters documenting performance from at least six independent persons external to the campus.
• Documentation from faculty, librarians, or administrators external to the individual library unit must be selected under the same conditions as external letters selected for faculty. Special care must be given to assure that the external reviewers are at “arm’s length” or independent as described in the section on External Assessment.
• Other documentation addressing the quality of performance, as described in your Library guidelines for P&T, should be included.

SECTION IV: Research and Creative Activity
• Research or its equivalent in the creative and performing arts is expected of all tenure-track and tenured faculty at IUPUI, as well as all research faculty, scientists, and scholars.
• For these faculty members, a threshold of documented satisfactory performance is required for P&T.
• In some units, funded research is an expectation and has become incorporated in departmental or school/unit standards for assessing excellence or satisfactory performance. Candidates should be careful to understand departmental or school/unit standards for external funding. Expectations should be applied consistently and equitably to all faculty. Information regarding the expectation for externally funded research should be available to all faculty in written form if it is a requirement for advancement.
• Peer review of research and creative activity is required.

Faculty: Documentation of Research or Creative Activity
This section generally consists of supporting documentation related to research or creative activity and, if this is the area of excellence, a Statement on Research or Creative Activity (a narrative that is a maximum of 2 single-spaced pages analyzing the research or creative activity area). Candidates should provide the
following evidence to document research or creativity in Section IV. They should feel free to address other points not identified below:

- **Identification and discussion of the three to five most significant publications that reflect the candidate’s major research accomplishments in rank.**
  - IUPUI places a higher value on quality and impact of research than number of publications.
  - In order to help reviewers outside the discipline to understand the importance placed on the order in which authors are listed in a publication notation, candidates should include descriptions of these conventions in their dossier.
  - Increasingly, research or creative activity involves collaboration. Such collaboration across institutional and disciplinary lines is encouraged. Candidates must be careful to document the extent and form of their contributions to collaborative work. They should make clear their individual role (e.g., conception of work; acquisition, analysis, and interpretation of data; writing, revisions, and other communication; administrative and material support) in such collective activity, preferably as related by colleagues involved in the joint work. Department or school/unit assessment of the individual contributions of the candidate who works with more than one author or collaborator must be included.
  - Department or school/unit evaluation of the stature of the journals in which the publications appeared, the museums or galleries showing creative work, or other venues for disseminating the results of research or creative activity must be included. Whenever available, the acceptance rates (or other evidence of stature or quality) should be noted. Avoid abbreviations; reviewers outside the candidate’s field are not likely to be familiar with them. In instances where a candidate is working in an interdisciplinary field and is publishing in journals or media other than the normal disciplinary publications, care should be taken to explain the nature, quality and role of the journals. If the published work is of demonstrably high quality, the fact that a journal is not (yet) highly ranked or even recognized within a discipline should not by itself be grounds for disqualifying or devaluing the publications.

- The candidate’s own description of a continuing program of research or creative activity that will carry forward into the future.

- Where applicable, there should be an assessment of the candidate’s contributions to interdisciplinary research, including written evaluations from appropriate peers in research centers or other departments.

**Librarians: Documentation of Professional Development**

- Documentation may take many forms, such as research (both applied and theoretical), publications, or presentations to professional or disciplinary groups.
- Documentation should include a definite continuing program of professional development that advances ideas, knowledge, and technical ability to the whole profession and academic life, including internal and external peer review. Annual reviews may also be included.

**SECTION V: Professional and University Service**

**Faculty: Documentation of Professional and University Service**

This section generally consists of supporting documentation related to service and, if this is the area of excellence, a Statement on Service (a narrative that is a maximum of 2 single-spaced pages analyzing the service area). Candidates should provide the following evidence to service in Section V. They should feel free to address other points not identified below:

- Professional service is normally provided to three specific groups:
  - the public (e.g., various local, national, and international communities; clients; and/or patients);
  - the profession or discipline;
  - the campus and University.
- Satisfactory professional service is expected of each faculty member and librarian.
- The importance assigned to service in considering candidates for promotion or tenure may vary according to individual circumstances and the mission of the unit.
- Professional service, including professional service in the community and patient or client services, is characterized by those activities conducted on behalf of the University that apply the faculty member’s and librarian’s disciplinary expertise and professional knowledge of interrelated fields to issues in society.
• To be the basis for tenure or advancement in rank, University and professional service must be directly linked to the unit and campus mission; the quality and impact of professional service must be evaluated within this context and must be assessed as academic work.

• In documenting excellence in professional service, faculty must be alert to the need to collect information and evidence at the time services are provided so that it can be used later to demonstrate impact.

• To be considered as the basis for advancement in rank or for tenure, professional service must be documented as academic work characterized by the following:
  o command and application of relevant knowledge, skills, and technological expertise;
  o contributions to a body of knowledge;
  o imagination, creativity and innovation;
  o application of ethical standards;
  o achievement of intentional outcomes; and
  o evidence of impact.

• Peer review within IUPUI and by disciplinary or professional peers at other universities or public settings is an essential component for evaluating all aspects of professional service, as it is for teaching and research.

• Evaluations of effectiveness by clients, patients, and other recipients of or participants in professional service activities may be critically important as evidence that can be summarized and assessed by disciplinary peers. Evaluation of service impact may include outcome data for the population served, compliance with evidence-based practice guidelines, or comparative data from benchmark groups.

• For lecturers, service may be directed toward the academic unit, but must be characterized as intellectual work to be considered as professional service. For example, developing standards for the assessment of the portfolios of entering students may be appropriately classified as professional service.

• Excellence in professional service ordinarily results in the dissemination of results and findings through appropriate publication, whether in print or electronic media. The journals, books, or web documents in which faculty publish the results of their service activities should be assessed and evaluated by department chairs (or deans) in the same manner as they are for research or teaching publications.

• Faculty claiming excellence in service, whose professional service consists primarily of patient or client service, must document how their work exceeds normative levels of activity and is, in fact, excellent because it contributes to the knowledge base or demonstrates a level of proficiency that itself illuminates practice for others. In all cases, this work must:
  o have impact beyond the direct recipient of the service; and
  o be documented through appropriate publications or dissemination activities.

• As with research, professional service may span traditional disciplinary boundaries. In such instances, candidates and chairs or deans may wish to develop appropriate procedures (e.g., a specially composed primary committee) to ensure that the nature of interdisciplinary professional service is fully and adequately understood and assessed.

• Professional service to clients and patients as well as to the discipline may be local, regional, national, or international.

This section should minimally include the following items:

• **Description of the candidate's professional service activities.**
  o Faculty involved in clinical practice should describe the variety and extent of patient or client care.
  o Those activities that are truly exceptional should be annotated to differentiate these activities from the level of clinical service expected as a normal distribution of effort.
  o Faculty presenting committee or voluntary service as evidence of achievement in service should demonstrate that it is a direct reflection of professional expertise and has been evaluated by peers as substantive professional and intellectual work.
  o Professional service that is the basis of advancement in rank or tenure must be clearly established as academic work.

• **Evidence of the significance and impact of the professional service** should be provided through tangible results that can be assessed in the context of unit and campus mission.

• **Evidence of the candidate's individual contributions**, especially when the professional service is collaborative in nature; specific contributions of the candidate should be noted.
• **Evidence of leadership** in providing professional service, especially when there is a collaborative environment, including contributions that build consensus, help others (including patients or clients) complete required assignments, and reflect the best practices and standards of the discipline; evidence of increasing levels of responsibility and sustained contributions are important.

• **Evidence of effective dissemination of results to peers, practitioners, clients, patients or service recipients** in reports, documents, or other means of dissemination that are designed appropriately to make the results understood and useful. While these reports may not be peer reviewed as a part of the publication and dissemination process, they should be evaluated by disciplinary peers for appropriateness and effectiveness as a part of the advancement review process.

• **Evidence and evaluation of the impact of university service.**

Documenting professional service activities when **excellence in professional service is the primary basis for promotion or tenure**:

• **External peer evaluation of products or results of professional service**, including refereed and non-refereed publications or other means of dissemination.
  o While some peers may come from the practice community, a majority should be independent academic peers from institutions with an equal or greater reputation in the area of professional service. Special care must be given to assure that the external reviewers are at “arm’s length” or independent as described in the section on *External Assessment*.
  o Care should be taken in describing the qualifications and relevance of external reviewers, especially when the reviewers are not academically based.
  o When professional service is conducted outside the U.S., it is advisable to seek some evaluation by appropriate peers in the relevant countries.
  o Client evaluations may not be substituted for peer evaluations.

• **Assessments from local faculty colleagues** who can place the quality of professional service within a context of departmental, school/unit, or interdisciplinary standards.

• **Evaluation by clients, patients or service recipients.**
  o Faculty should arrange for timely evaluations by recipients and determine appropriate ways to use this information.

• **When professional service is highly repetitive**, as is often the case in patient care, candidates should comment on the cumulative impact of the repeated activities. Quantity of patient service ordinarily is not a sufficient factor in promotion or tenure, although it is expected to be high to support an area of excellence.

**Librarians: Documentation of Service**

• The notion of professional service, as it is applied to faculty, is seldom applicable to librarians since ‘professional service’ is more typically an aspect of librarian performance. Nonetheless, professional services that do not fall within the scope of a librarian’s position description may be included as evidence satisfying the service criterion. These may take the form of professional consulting or teaching.

• Documentation of service should focus on impact.

• A librarian must present evidence of satisfactory service for tenure and, if service is cited as an area of emphasis, evidence of continued improvement beyond the satisfactory level for promotion from assistant to associate librarian.

• Service to national or international organizations is highly encouraged, but not required. Institutional, local, regional, and national service should be documented through peer and external review.

**SECTION VI: Curriculum Vitae**

**Materials Provided by Initiating Unit.** The initiating unit should ensure that the dossier includes a copy of the candidate’s current curriculum vitae prepared in accord with the standard format (see Appendices).

**SECTION VII: Appendices**

• Appendices are not part of the 50-page limit.

• Appendices should provide documentation for all of the assertions made in the Candidate’s Statement.
• Appendices may include articles published or accepted for publication, grant proposals accepted or under consideration, syllabi for redesigned courses, or any other materials that support a case for excellence in a chosen area and at least satisfactory performance in the other areas.
• Librarians, in accord with guidelines for librarian dossiers, should add separate appendices that include supporting documents for: (1) performance; (2) professional development; and (3) service. Appendices should be as succinct and as carefully selected as possible.
• Appendices are to be retained at the school/unit level, but be available to the campus level upon request.

PEER REVIEW AND EXTERNAL ASSESSMENT

Peer Review
• The evaluation by peers of teaching, research and creative activity, and service is the bedrock on which P&T decisions are based.
• This evaluation should occur continuously across the career in the form of regular peer review of teaching, research and creative activity, and service.
• At intervals where candidates seek promotion and/or tenure, an additional level of peer review of the overall record is needed.
• These two types of peer review, ongoing review of teaching, research and creative activity, or service, and assessment of the overall record, are both important and subject to different considerations.

Ongoing Review
• Traditionally, peer review of research and creative activity has been a standard feature of faculty work.
• Evaluation of work submitted to journals, juried shows, or other outlets for dissemination is considered the routine way to document the quality of this work.
• Expectations for peer review of the quality and impact of teaching and professional service are now well established at IUPUI.
• Peer evaluation of teaching or professional service is expected for all candidates with teaching or professional service as an area of performance and it is required for those whose advancement is based on excellence in teaching or professional service. In the absence of a clear reason for the omission, dossiers without peer evaluations may be returned as incomplete. Ongoing peer review need not occur every year, but there should be a record of sustained peer review over the interval since appointment or last promotion.
• Ongoing peer review may be provided by local, national, or international peers.
• To be credible, peer reviewers must be identified according to their expertise or competence to comment.
• These peer reviews should be requested at intervals by the department chair as part of the department’s peer review policies and procedures, and conducted in the standard way specified by the academic unit.

External Assessment
External assessment is essential to provide the committees evaluating each candidate for promotion and/or tenure an objective evaluation of the value and impact of the candidate’s work within the discipline, and to demonstrate that each candidate for associate professor has achieved an emerging national reputation and that each candidate for full professor has achieved a sustained national reputation.
• As IUPUI grows in complexity and as the nature of faculty and librarian work evolves, expectations for the form of independent, external assessment of the overall record appropriate to each type of faculty appointment continues to be refined.
• External assessment (ordinarily in the form of a letter or verified email note) is expected of all candidates at all ranks. To provide each candidate maximal opportunity for success, at least six letters are required.
• The candidate should not be involved in the selection of external reviewers, with two exceptions: 1) the candidate should be allowed to list those he or she would definitely not want to serve as an external reviewer, and 2) the candidate may provide a list of key scholars in the field if these are not known to the chair or the chair’s designee. The candidate must discuss this list with their academic administrator and should indicate clearly on the list that each meets the “arm’s length” or independent criteria outlined below. Chairs or deans are not required to use the external reviewers identified by candidates.
• Chairs/Deans may seek additional guidance to identify potential external reviewers, for example, from chairs of similar departments in other universities, from senior faculty in the department in the same or
related specialty, or from the scholars quoted in the candidate’s publications. Reviewers do not have to be scholars in the identical sub-specialty as the candidate. Candidates should not know the identities of the external reviewers.

- **Criteria Defining “Arm’s Length” or Independence of External Reviewers:**
  The relationship between the reviewer and the candidate should be as independent as possible. To qualify as “arm’s length” or independent, reviewers providing external assessment should have no personal or professional relationship with the candidate that would cause them to be vested in the candidate’s promotion. Specific examples of reviewers to avoid include (but are not limited to) former or current mentors, co-authors, or scholarly collaborators in the last five years. Exceptions can be made in the case of very large national clinical trials where multiple authors have a very distant relationship or in the case of serving on national research panels. The department chair needs to specifically make the case for including such a reviewer. If in doubt, please contact the Associate Dean of the Faculties. Every precaution should be taken to ensure that referees are objective and credible; persons closely associated with the candidate may not be as objective as those who are not personally associated.

- **External reviewers must be at a rank higher than the current rank of the candidate,** and at a peer (or better) institution.

- School/unit practices may vary in regard to who solicits external letters, but the candidate should not solicit or receive his or her own letters. Chairs should indicate how the external reviewers were selected.

- General expectations for external assessment vary with type of appointment.

</table>

- When excellence in teaching or professional service is a basis for advancement, it is important to provide documentation that will enable external reviewers to make informed judgments.
  - For teaching, most schools/units have effectively sought external evaluation of course design and materials as part of their review of teaching accomplishments. This type of evaluation may be particularly helpful in considering materials prepared for use with new technologies (e.g., internet, multimedia, videos, computer simulations, databases, software) or for judging the incorporation of service learning as a part of courses.
  - For professional service, candidates should include sample reports, presentation materials or other items, illustrating their scholarship of service, as well as evaluation or impact data related to their work.
  - Without documented results and without external peer review, candidates for advancement based on excellence in teaching or professional service should not expect to succeed.
- Librarians should provide external reviewers with materials appropriate to their context, in addition to the standard information on responsibilities and publications and presentations documented in the vita and candidate’s statement.
- For further assistance with soliciting letters and for a solicitation template, please consult the appendices.
- When submitted to the Dean of the Faculties through FAA, all dossiers will be given an initial administrative review to assess whether or not the external assessment appears to meet the requirements of these guidelines. If the dossier appears to be deficient in some way, it will be returned with the expectation that the deficiency can be addressed before the campus-level review begins (see Returned Dossiers).

**INSTITUTIONAL PROCEDURES**

**Submission Deadlines**
- Dossiers are due to the Dean of the Faculties through FAA no later than **Friday, October 30, 2009**.
- If extenuating circumstances exist, a request for a time extension should be sent to the Dean of the Faculties for approval before this date.
- Under no circumstances will the deadline extend beyond **Wednesday, November 25, 2009**. Dossiers submitted late (i.e., after November 25, 2009) or not submitted in accord with these guidelines may be returned and consideration deferred until the following year.

**Returned Dossiers**
- Dossiers will immediately be checked to ensure that they are complete, that they are prepared in accord with these guidelines (or an appropriate earlier version of the guidelines), and that letters of evaluation (especially external letters) meet the expectations set forth in these guidelines.
- If there are deficiencies or concerns as a result of this administrative review, dossiers will be returned to the dean with a specific request for remedy and a date by which the dossier must be resubmitted (or corrected).
• Such requests will ordinarily be made within the first or second weeks of December to allow as much time as possible to address deficiencies.

• Dossiers may also be returned as a result of reviews by primary readers or by committee action. Since these actions will occur after the deliberative process is underway, there may be limited—even insufficient—time to address problems. Accordingly, candidates, deans and school/unit-level administrators are strongly encouraged to review dossiers to ensure that:
  o materials are in the proper format and order;
  o peer reviews of teaching, research and creative activity, and service have been included;
  o external reviews meet the “arm’s length” or independent criteria (see External Assessment); and
  o only required materials are forwarded to the Dean of the Faculties through FAA.

If there is uncertainty about what may be required, candidates or chairs should confer with the Assistant Dean of the Faculties in FAA as soon as possible.

Time in Rank
• In most instances, the work being assessed as the basis for promotion or tenure will have been completed since either the initial appointment or last promotion. For faculty, publications and presentations in rank at another institution prior to appointment at IUPUI will be considered part of the candidate’s record.

• While the probationary period for untenured faculty ordinarily is seven years (with the tenure review occurring in the sixth year), special conditions may warrant earlier than normal consideration.

• For librarians, tenure is based on the entire professional career, including relevant professional positions held prior to coming to Indiana University.

• There is no defined period between associate and full rank, although most candidates seek full rank five to ten years after promotion to the associate rank. Occasionally, the period under consideration may vary due to prior appointments at other institutions, the cumulative nature of some work that may build on earlier accomplishments, leaves that may have extended the probationary period, administrative roles or earlier than normal consideration.

• When a case has special circumstances, the context for considering a candidate should guide the judgment of reviewers. Candidates and department chairs should provide an explanation for any unusual conditions that may affect the review of the candidates’ dossiers.

• Candidates who seek earlier than normal consideration must present evidence of achievements comparable to those who have served the full probationary period. Earlier-than-normal cases sometimes require special care to ensure equity of treatment.

• Some faculty may have a longer-than-normal probationary period. Because extensions are formally approved for important reasons, such as illness, childbirth or unavoidable delays in research infrastructure, candidates should not be held to higher expectations because of a longer-than-normal probationary period.

• Part-time faculty in eligible classifications may be considered for tenure and their probationary periods should be proportionate to those of full-time appointees. Typically, agreements regarding the length of a probationary period for a part-time faculty member have been committed to writing.

• In considering candidates for tenure, where there are questions about time in rank, reviewers are reminded that tenure assumes an extended period of productivity and improvement. The purpose of the probationary period is to give candidates for tenure an opportunity to demonstrate their capacity for sustained excellence and an ability to adapt to changing conditions of their disciplines and the institution. In some cases, consideration of work completed elsewhere or prior to appointment to a tenure-track position may be appropriate. Regardless, the dossiers must present clear evidence of the candidate’s ability to contribute at the expected levels throughout his or her professional career.

Area of Excellence
• The Indiana University Academic Handbook requires that a candidate for promotion in a tenure-related classification excel in at least one area and be at least satisfactory in each of the other two.
  o Faculty determine their area of excellence within the academic norms and context of their primary unit. It is not the role of any review committee to change the area of excellence declared by the candidate. Faculty should select just one area of excellence unless presenting a balanced case.
Review committees may comment in their evaluation of the dossiers that one or more additional areas are also excellent.

- **Balanced case:** In some circumstances, faculty may present a record of highly satisfactory performance across all three areas sufficient to demonstrate comparable long-term benefits to the University. However, the P&T standards in many departments/units encourage the choosing of one area of excellence. Faculty should be aware of the preferences of their department/unit.

- **Appropriate areas of excellence** have been designated for faculty in all categories as summarized in the Appendices’ chart “Summary of Areas of Excellence and Expectations for Various Faculty Categories.” High expectations for performance within areas defined for each kind of appointment are universal across faculty titles; however, the nature of the work performed by faculty varies and the ways in which faculty accomplish their work and document performance also varies, depending on the context of the work. Similarly, disciplinary expectations will influence the emphasis faculty place on different activities and types of accomplishments and the way in which they are documented.

- In the case of tenure-track faculty, the evaluations of the dean and the department chairperson, as well as the evaluations of the primary and school/unit committees (often referred to as the unit committee), must address the area the candidate advances as representing excellence: teaching, research and creative activity, or service. The area of excellence should be identified on the Routing and Action Form (see Appendices). Each evaluation should include a general assessment of each of the three categories (e.g., in terms of being excellent, satisfactory, or unsatisfactory). Sometimes faculty document excellence in more than one area. When an individual’s record warrants such a claim, reviewers are encouraged to note such an accomplishment.

- Tenure requires performance commensurate with rank and promise of continued service with distinction. Accordingly, candidates for tenure at the rank of assistant professor should understand that such a decision on tenure will be made separate from promotion in only very rare situations, such as documentation of circumstances that make clear the imminent attainment of promotion.

- In addition to having at least one area of excellence (or a balance of strengths at the highly satisfactory level in all three areas to be equivalent), all faculty in tenure-related ranks must be at least satisfactory in all areas of teaching, research and creative activity, and service to be eligible for promotion or tenure. A faculty member whose work in any one of these three areas is less than satisfactory will not be recommended for promotion or tenure. Faculty whose University service (often referred to as “academic citizenship”) is not at least satisfactory may not be advanced for this reason as well. Maintaining high standards of professional conduct is a requirement for tenure and is expected across teaching, research and creative activity, and service.

- Librarians are obligated to maintain high standards of performance in the development of library services and in the communication of information and knowledge to others. Evaluations cover the areas of performance, professional development, and service. For tenure, performance must be excellent, and professional development and service must be satisfactory. Tenure is granted to those librarians whose professional characteristics indicate they will continue to serve with distinction. For promotion from assistant to associate librarian, performance must be excellent, and the candidate must demonstrate a level of achievement beyond satisfactory in one of the other two areas. The third area must be satisfactory. For promotion to full rank, the librarian must demonstrate superior performance and a continued significant contribution at the state, regional, national, or international level in either professional development or service. Performance in the third area must be satisfactory. Librarians must maintain high standards of professional conduct across all areas of responsibility.

- Clinical faculty are required to be excellent in either teaching or service and satisfactory in the other area. They have no formal research requirements for promotion.

- Lecturers are required to be excellent in teaching and satisfactory in service. They have no formal research requirements for promotion.

- Research professors, scientists, and scholars are required to be excellent in research or creative work.

- Expectations for University and professional service will vary by unit and must be articulated in unit policies or in explanatory materials from the dean or chair contained within individual dossiers.

### Addition of Materials/Comments

Additional materials submitted by candidates during the review process for inclusion in the dossier must be provided to all administrative officers and committees that have already assessed the dossier.
• It is the candidate’s responsibility to provide these materials to the chair, school/unit dean, or Dean of the Faculties, depending on the level at which the dossier is being considered.
• In turn, these administrative officers will ensure that all prior reviewers have an opportunity to consider added materials.
• All prior reviewers have the right to comment on additional material, but these comments need to be forwarded through the same review process, beginning with the primary committee.
• Committees at prior levels may elect to change their vote on the case if circumstances warrant this action.
• Comments are neither required nor expected. In the case of factual information (e.g., acceptance of a journal article listed as under review), these additions are routine and ordinarily require no comment.
• **Once the dossier is submitted to the campus level, no updates of the vita or the candidate’s statement are allowed.** A candidate may add a note, either about new information or in response to a level of review, for inclusion in the dossier. It is the Associate Dean of the Faculties’ responsibility to see that such additions are provided to all administrative officers and committees that have already assessed the dossier.
• In instances where a committee or administrative officer seeks additional information or material, this material must be provided to both the candidate and persons who have already reviewed the dossier, all of whom must have an opportunity to comment. There is one exception: candidates are not provided external review letters.
  o It is the responsibility of the persons seeking additional materials to provide such material to all concerned parties.
  o These comments then become a part of the dossier. Such additions must be made only when clearly necessary.
  o Ordinarily there will be very little time allowed for comment, and concerned parties must act within specified deadlines.

**Reconsideration**

• Under special circumstances, Indiana University policy allows for reconsideration. This policy **applies only to tenure cases where a candidate receives a negative recommendation.**
• In instances where a candidate wishes to add comments or materials that are relevant to the recommendations of a review, this addition of materials constitutes a request for reconsideration. Candidates should consult the "Policies Governing Reappointment and Non-Reappointment during Probationary Period" statement in the Indiana University Academic Handbook. This policy states, in part, indicates that the faculty member or librarian who believes that a recommendation or a decision that he or she not be granted tenure has resulted from inadequate consideration of professional competence or erroneous information may offer factual corrections and request reconsideration at the level at which the decision not to recommend tenure was first made.
• The request for reconsideration must be made within two weeks after the faculty member or librarian receives notification of the negative recommendation and before the review at the next level is completed.
• Reconsideration is not an appeals process but an opportunity to correct the record while review is still underway.
• Under unusual circumstances, reconsideration of promotion decisions may be permitted with the approval of the Dean of the Faculties. The procedures noted above will be followed in such a situation.
• Nothing in the act of requesting reconsideration or being reconsidered precludes a candidate’s later seeking a Faculty Board of Review.

**Campus Level Reviews and Notification**
The IUPUI P&T Committee uses a primary and secondary reader system.
• Readers use a summary report form (see Appendices) to present their evaluation/assessment of cases assigned to them for review in advance of the meeting when a particular case is considered.
• All members of the committee read the full dossier when there have been divided votes at earlier levels of review, where fewer than 75% of eligible reviewers approve of promotion or tenure, or when the primary or secondary reader makes such a request.
• Following consideration of the reviews of the primary and secondary reader, members of the Campus P&T Committee discuss the case and vote. Candidates receive the final vote from the campus committee, without narrative.
• The Dean of the Faculties or a designee attends all meetings, listens to the discussion of each case, and reads the readers’ reports.
• Subsequently, the Dean of the Faculties and Chancellor read each dossier, review all prior evaluations, and confer about a recommendation to the President and Board of Trustees.
• In the case of Purdue faculty, recommendations regarding promotion are made to the President and Trustees of Purdue University.
• P&T recommendations for Indiana University faculty and librarians and tenure recommendations for Purdue faculty are made to the President and Trustees of Indiana University.
• Faculty and librarians are notified when these recommendations are made.
• A formal subsequent notice of final action is provided to faculty and librarians after the Trustees act on the recommendations.
• In instances where a candidate is not being recommended for promotion or tenure, the memorandum informing candidates of this action will ordinarily be the only notice of a negative decision.
• Probationary faculty not recommended for tenure will also receive a notice of non-reappointment from the Chancellor.

INSTITUTIONAL VALUES
This section addresses foundational values of IUPUI that are expected to be recognized and rewarded as part of the annual review, three-year review, reappointment, and promotion and tenure processes.

Civic Engagement
• As an urban research university, IUPUI has a committed relationship to the local, state, and global community.
• Civic engagement is consequently a significant part of our mission and our intellectual activity.
• Faculty work that contributes to our role as a civically engaged institution, including participation in service learning projects and mentored internships is highly valued and should be acknowledged and rewarded in the review process.

Collaboration
• The work of the academy is often advanced through collaboration and joint work, especially in new or interdisciplinary areas where the expertise and experience of more than one colleague may be required.
• Results of this work—whether teaching, research and creative activity, or service—are frequently disseminated through publications with joint authorship.
• Collaborative work is valued, but candidates should make clear their individual role in such collective activity, preferably as specified by colleagues involved in the joint work.

Diversity, Equity, and Inclusion
• IUPUI is committed to providing, nurturing and enhancing a diverse community of learners and scholars in an environment of equity and inclusion.
• Faculty work that contributes to the diversity of learners and scholars at IUPUI and that enhances our environment of equity and inclusion is highly valued and should be acknowledged and rewarded in the review process.

Economic Development of Indiana
• IUPUI is committed to enhancing the economic development of Indiana.
• Faculty work that contributes to enhancing the economic development of Indiana should be acknowledged and rewarded in the review process.

Entrepreneurial Work and Innovation
• IUPUI is a comparatively new institution and has had an opportunity to develop policies, procedures and programs that build on the experiences of others, adapting best practices and creating innovative new approaches to teaching, research and creative activity, and service.
• This opportunity has led many faculty to be entrepreneurial in their University duties, after leading their own disciplines into new areas of inquiry or seeking collaboration with other disciplines.
• While there is no criterion specifying entrepreneurial work or innovation, these qualities have long been appreciated and valued within the more traditional criteria ordinarily used to assess faculty achievement.
• Documentation of the impact of this work will help reviewers of the dossier understand its significance.

Interdisciplinary Work and Publication
• In the instance of candidates who work in interdisciplinary fields that transcend the intellectual authority of any single school/unit, special arrangements for primary and unit committee reviews may be necessary.
• The school/unit that serves as administrative host for such a program should assume responsibility for preparing and transmitting files while making accommodations for participation of faculty from other schools/units in a primary committee and for an alternative unit committee.
• The special or ad hoc arrangements should be stipulated in advance, be known to the candidate, the program administrators (dean or director), and the dean of the host school/unit.
• In instances where there is not agreement on procedures among the concerned parties, the Dean of the Faculties will determine the process and procedures for reviewing candidates.
• The same high standards of achievement and of documentation for traditional disciplinary work apply to interdisciplinary work.
  o Journals that publish interdisciplinary work may not be as well-recognized or widely-known to the reviewers as other journals, but these may be the most appropriate places to publish.
  o Care must be taken to consider the nature and quality of journals or other media where interdisciplinary work appears.
  o Holding formulaic expectations for work appearing in “top tier” journals is not likely to serve either institutional or individual interests well in every case.
  o Candidates should help their chairs to document and establish the quality of such journals—including those in electronic formats—but reviewers have a reciprocal obligation to evaluate the quality of the work on its merits and not solely on the reputation of the journal within a discipline.
  o In some instances, external assessments of outlets for publication may be useful and such information may be included within the dossier.

International Work and Publication
• Scholarship and professional work are now often international in terms of their impact and application; collaborators are sometimes based in other countries; and appropriate journals, conferences, and other forums for dissemination may be international in scope and/or published outside the U.S. and in languages other than English.
• Such international work and outreach are encouraged.
• In most cases, they may be evaluated using standard procedures. Sometimes, however, they may require special forms of review and assessment, even—in some cases—the provision of translations.
• Review committees should demonstrate the same flexibility in assessing such international work as they do for interdisciplinary work.
  o International variations in rankings, modes of inquiry, and forms of dissemination must be acknowledged.
  o Candidates and chairs should take special care to explain the quality, audience, impact, and value of such international work and to solicit external evaluation by international peers, when appropriate.

Principles of Undergraduate Learning (PULs)
• The intellectual foundation of our general education and baccalaureate programs is articulated through the IUPUI Principles of Undergraduate Learning.
• Faculty work that integrates these Principles into the curriculum, improves student understanding of these intellectual skills and ways of knowing, and documents student achievement of these Principles in relation to the discipline, whether through ePort or any other means, should be acknowledged and rewarded in the review process.

Research and Creative Activity in the Urban Environment
• Applied research or creative activity that integrates various applications into improved practices, is often as essential as or as valuable as theoretical research.
• IUPUI has made interdisciplinary research a particular focus for its mission and its strategic objectives as a result of combining in one place the traditionally differentiated missions of Indiana University and Purdue University.
• As the state’s only public metropolitan university, IUPUI has specific opportunities and responsibilities to engage in research that draws on and supports its urban environment.

Service
• The distinction between professional service and service to the University requires some elaboration.
  o Faculty and librarian service to the University through committees and administration is important and required. The community of scholars depends on the mutual responsibility of individuals to support and develop the institution that sustains them.
  o Service must be a factor in these considerations, because unsatisfactory service to the University may preclude successful application for P&T.
  o Administrative service that uses disciplinary expertise for innovative or successful achievements reviewed by peers may be offered as evidence of achievement of professional service when such work:
    ▪ has been planned and stipulated in advance;
    ▪ when it is derived from the mission of the unit;
    ▪ when it is disseminated to a broader audience; and
    ▪ when it is peer reviewed.
• Not all committee service is equal.
  o Some committees, such as an Institutional Review Board, the Committee on Ethics in Research, or a Faculty Board of Review, may require extensive time commitments and may address principles or issues fundamental to the continued effectiveness of the campus. These special features need to be recognized.
  o The primary committee, chair, unit committee and dean are best able to assess the degree of performance of University service.
  o If it is deemed inadequate or unsatisfactory, this fact should be noted and an evaluation based on the documented record of performance should be included in the dossier when it is forwarded to the campus level for review. The candidate must be informed and be provided an opportunity to respond prior to a final recommendation at the primary and unit levels.

Translational Research
• As an urban research university with a commitment to the local and global community, IUPUI values research that can be translated and applied to the needs of the local and global community.
• IUPUI is the nation’s first “translational campus” where research that can directly meet the immediate and future needs of the community is a stated value.
• Faculty engaged in translational research should have that work acknowledged and rewarded in the review process.

RISE to the IUPUI Challenge
• Experiential learning plays a powerful role in engaging and retaining students, enhancing the likelihood of their persistence to graduation.
• Faculty who mentor students in undergraduate research, international, service learning and work-related experiential learning should have that work acknowledged and rewarded in the review process.
## SUMMARY OF AREAS OF EXCELLENCE AND EXPECTATIONS FOR VARIOUS FACULTY CATEGORIES

<table>
<thead>
<tr>
<th>Advancement to</th>
<th>Area of Excellence(^1)</th>
<th>Other Areas of Performance</th>
<th>Expectation for External Peer Review of Case</th>
<th>Standard for Excellence (over and above record of quantity, quality, and impact of internal work)</th>
</tr>
</thead>

\(^1\) Balanced case expectations are defined by the *Indiana University Academic Handbook* as: “balanced strengths that promise excellent overall performance of comparable benefit [to excellence in one area and satisfactory in the others] to the University.” This category applies to only tenure-track faculty and is to be used in exceptional cases.

\(^2\) For tenure decisions, tenure expectations are for performance commensurate with rank and evidence of continued service with distinction.

\(^3\) For tenure decisions, performance must be excellent, and professional development and service must be satisfactory. Tenure is granted to those librarians whose professional characteristics indicate they will continue to serve with distinction.

\(^4\) Balanced case exceptions for librarians only apply to the secondary criteria (to professional development, research and/or creativity and to service).

\(^5\) Independent is defined in the section on [External Assessment](#).
Balanced case expectations are defined by the *Indiana University Academic Handbook* as: “balanced strengths that promise excellent overall performance of comparable benefit [to excellence in one area and satisfactory in the others] to the University.” This category applies to only tenure-track faculty and is to be used in exceptional cases.

# Suggested Standards for Evaluating Teaching Performance

<table>
<thead>
<tr>
<th>Type</th>
<th>Unsatisfactory</th>
<th>Satisfactory</th>
<th>Highly Satisfactory</th>
<th>Excellent</th>
</tr>
</thead>
</table>
| **Instruction**             | Incomplete lists of formal instruction  
Incomplete evidence to interpret load  
Incomplete information about goals of instruction  
Incomplete or only raw student evaluation data with no interpretation of their meaning, either absolute or comparative  
Incomplete information on learning outcomes  
Absence of peer review evidence or superficial peer commentary not based on systematic review  
Poor performance on many of the above measures | Quantitative and qualitative information from the candidate, students, and peers indicating that instruction has been satisfactory in fostering appropriate learning outcomes | Quantitative and qualitative information on teaching and learning outcomes that make the case for effective and innovative instruction | Documentation of extraordinarily successful teaching and learning outcomes  
The case for teaching excellence is grounded in a sophisticated teaching philosophy  
Evidence of innovative and reflective teaching practice. |
| **Course or Curricular Development** | Incomplete evidence of nature of activities or results  
Incomplete evidence of individual role in outcomes  
No review by others  
No evidence on how work is connected with department or campus goals  
Poor course or curricular design products | Evidence of new course development or significant course revision (e.g., use of technology, service learning) presented with evidence on effectiveness | Nature of course or curricular development clearly reflects an informed knowledge base, clear instructional goals, and assessment of the outcomes | In addition to producing effective course and curricular products, shows evidence of having disseminated ideas within the profession or generally through publication, presentation or other means. Evidence that the work has been adopted by others (locally and nationally) indicates excellence |
| **Mentoring and Advising**   | Numbers of students mentored or advised and details of interaction not provided  
Comparative load for unit not indicated  
Information on impact of mentoring and advising not presented  
Poor performance indicated by data | Mentoring and advising load is clearly documented and contextualized  
Student satisfaction indicated by evidence  
Satisfactory impact on student achievement clear | Important impact and student achievement documented | Mentoring and advising characterized by scholarly approach  
High accomplishments of students mentored or advised consistently linked to influence of mentor  
Scholarly and reflective approach to mentoring and advising documented  
Demonstrated impact on accomplishments of mentored and advised students  
External peer review clearly demonstrates the attributes of scholarly work associated with mentoring or advising, including peer refereed presentations and publications and national recognition of the quality of work |
<table>
<thead>
<tr>
<th>Scholarly Activities, including Awards</th>
<th>Professional Development Efforts in Teaching</th>
</tr>
</thead>
</table>
| No teaching awards or other recognition of successful teaching and learning  
No evidence of dissemination of good practice or scholarship of teaching and learning (SoTL) | No information about teaching development efforts given  
Poor record of performance in pursuing growth in teaching expertise  
No mentoring of colleagues  
Evidence of ineffective performance in this area |
| Evidence of some local dissemination of good practice and/or SoTL  
Some recognition of teaching efforts | Record of some activity, such as conference or workshop attendance, personal experimentation, or reading  
Record of mentoring other teachers  
Reflective commentary on candidate’s own teaching  
Peer assessment on effectiveness of efforts toward personal growth or mentoring of others |
| Evidence of regular and significant local dissemination of good practice and recognition of high quality of teaching  
Grants or awards at the department or campus level  
(For clinical and lecturer categories, this level constitutes excellence) | High level of activity in examining practice, seeking new ideas, obtaining feedback, and engaging in dialogue on teaching with campus or disciplinary peers  
Indications of substantial positive impact on colleagues  
Positive peer assessment of these teaching experiments  
(For clinical and lecturer categories, this level constitutes excellence) |
| Documentation of a program of scholarly work that has contributed to knowledge base and improved the work of others through appropriate dissemination channels  
Positive departmental evaluations of the stature of the published work (e.g., journals)  
Peer review supporting the quality of the publications, presentations or other dissemination methods  
National or international teaching awards or significant funding for teaching projects | Extensive record of participation in experimentation, reflection, pursuit of conceptual and practical knowledge of teaching and learning  
Membership in communities of practice on the campus, national, or international level  
Participation in dissemination of good practice  
Peer review of efforts and impact of candidate’s work in this area |
### Documenting Research and Creative Activities in the Dossier

</table>

*University service is necessary for promotion and/or tenure. It qualifies as professional if it is documented as intellectual work that relates to the discipline or to the mission of the university. For example, the economist on the task force charged with revising university revenue distribution policies may be performing professional service but the English professor would be engaged in university citizenship.*
## SUGGESTED STANDARDS FOR EVALUATING PROFESSIONAL SERVICE

<table>
<thead>

</tr>
</tbody>
</table>
At the department or school level, a person well-informed about requirements for P&T dossiers should:

- review the candidate’s full dossier;
- ensure that all required materials are included;
- place materials in the proper order;
- remove unnecessary items;
- complete this checklist; and
- provide his or her contact information in case campus-level reviewers have questions about the content or form of the dossier.

This reviewer may be an administrative assistant, designated faculty member, or other person specified by the chair or dean. The reviewer is required to sign the bottom of this checklist indicating that to the best of his or her ability the requirements for dossier preparation have been met. The reviewer should refer to the Dossier Format section (page 10) for explicit rules about dossier contents.

CHECKLIST:

Note: Not every item is required in every case, but most items are required in most cases.

☐ Submit Original and Two Copies of Dossier
  - Electronic copies can be submitted on a CD; however, if documents are in PDF format then each section must be in a separate PDF file. The Dean of the Faculties Office will not accept one PDF containing the entire dossier.
  - Each of the six sections of the dossier should be separated, labeled, and stapled with the entire dossier placed into a single file folder labeled with the candidate’s full name and school. Do not use three ring binders for dossiers.
  - Supplementary materials (e.g. appendices) are to be retained by the school/unit and should not be forwarded to the Dean of the Faculties Office unless specifically requested.

General Summary
☐ *Completed School/Unit Review Form and Checklist
☐ *Routing and Action Form
☐ *Dean's recommendation and summary evaluation of candidate's work
☐ If a candidate has an adjunct or joint appointment in another school, letter of recommendation from that school or unit’s dean or an appropriate representative
☐ *School/Unit Committee's recommendation and evaluation of candidate's work
☐ If a candidate has an adjunct or joint appointment in another school, recommendation from that school’s committee (optional—decided by that school)
☐ *Chair's recommendation and evaluation of candidate’s work
☐ *Primary Committee's recommendation and evaluation (including statement concerning candidate's potential for continued development)
☐ *External letters of evaluation and statement of expertise of letter writers

Candidate’s Statement
☐ *Candidate’s own statement on work (a narrative assessing accomplishments and including plans for future work in all areas, a maximum of 5 single-spaced pages)
Teaching and Teaching Scholarship
☐ Teaching Statement (a narrative that analyzes the teaching area and is only to be included if this is your area of excellence, a maximum of 2 single-spaced pages)
☐ Teaching load information; graduate committees served on or chaired
☐ Peer evaluation of teaching
☐ Student evaluation of teaching (in aggregated format)
☐ Evidence of student learning and match with unit and IUPUI student outcome goals
☐ Evidence of scholarly dissemination of work and leadership on teaching
☐ Departmental evaluation of stature of journals in which teaching publications appear
☐ Evidence of undergraduate or graduate student research or mentoring
☐ Evidence of quality of course development or innovation efforts
☐ Listing of teaching awards and grants
☐ Evidence of teaching development efforts

Research or Creative Activity
☐ Research and Creative Activity Statement (a narrative that analyzes the research or creative activity area and is to only be included if this is your area of excellence, a maximum of 2 single-spaced pages)
☐ Peer evaluation of research or creative activity
☐ Evidence of scholarly products and presentations
☐ Departmental evaluation of stature of journals in which publications appear or galleries in which showings have been presented
☐ Research load information; amount of time devoted to research
☐ Documentation of individual contributions to collaborative work

Professional and University Service
☐ Service Statement (a narrative that analyzes the service area and is to only be included if this is your area of excellence, a maximum of 2 single-spaced pages)
☐ Summary of professional service activities and service load information
☐ Peer evaluation of quality as well as quantity of professional service as intellectual work
☐ Evidence of scholarly publications, presentations, or other means of dissemination
☐ Departmental evaluation of stature of journals in which publications appear
☐ Evaluation by chair of quality and quantity of professional service
☐ Evaluation by chair of the adequacy of University service

Curriculum Vitae
☐ *Copy of candidate’s curriculum vitae

Appendices
☐ As determined by candidate and department/unit

Do NOT forward Appendices to Dean of the Faculties Office unless specifically requested

*These materials will be retained by Dean of the Faculties Office for permanent file.

The following certification may not be provided by the candidate.
I have reviewed this candidate’s dossier and certify that the materials checked off above are included. To the best of my knowledge, this candidate’s dossier meets all the requirements for dossier preparation.

CURRICULUM VITAE FORMAT
FOR PROMOTION AND TENURE DOSSIERS

NAME: ________________________________________________

(Last) (First) (Initial)

EDUCATION:
  UNDERGRADUATE: ______________________________________
  GRADUATE: ______________________________________________
  POST DOCTORAL: _________________________________________

ACADEMIC APPOINTMENTS (inclusive dates):

OTHER APPOINTMENTS AND PROFESSIONAL CONSULTANTSHIPS (including other remunerated employment):

LICENSURE AND CERTIFICATION:

PROFESSIONAL ORGANIZATIONS (including offices held and committee memberships):

HONORS AND AWARDS:

TEACHING ASSIGNMENTS:
List the course number, short title, term, and enrollment for each course taught since appointment or last advancement.
(For LIBRARIANS: PERFORMANCE:
Provide a composite description of your professional experience and activities in your current position at IUPUI and, where applicable, prior to coming to IUPUI)

PROFESSIONAL SERVICE:
Distinguish carefully between University and professional service and record professional service activities that advance the discipline or interdisciplinary field of inquiry as intellectual work.

UNIVERSITY SERVICE:
List committee, administrative, and other University service since appointment or last advancement.

OTHER PROFESSIONAL ACTIVITIES:
Record professional activities in current rank that you consider significant that are directly related to your work as a faculty member, and which are not covered elsewhere in curriculum vitae, including international activities not listed elsewhere. This section can be used to detail presentations that are not listed in other categories. They should be annotated to include information on audience and place of presentation, as well as date and title, co-presenters, if any, and whether the presentation was invited or made following a peer review process. Please do not include voluntary service in this section, no matter how significant or important to the civic community.

GRANTS AND FELLOWSHIPS:
Indicate the name of the granting agency, title of the project, amount, and duration of all grants and fellowships received.
PRINT AND ELECTRONIC PUBLICATIONS:
Divide publications or creative activities into three areas: (I) teaching, (II) research and creative activity, or (III) service. Publications should only be listed once so when work involves integration of two or more aspects of faculty work, it should be placed in one area with a notation such as (T), (R), or (S) preceding it to indicate that it belongs in multiple categories. Authors should be listed as they appear in the publication. Refereed and non-refereed works should be noted by separating works into distinct categories within each of the three areas. Their full relevance to teaching should be provided in the curriculum vitae as specified in the standard format. Refereed and non-refereed publications should be separated into distinct categories. Co-authored and multiple-authored publications should be annotated to explain the nature and extent of the candidate’s contribution.

Entries should be listed chronologically or in reverse chronology, consistent with the traditions of the discipline. The exact status of each publication should be noted if the status is ambiguous. For example, unpublished articles that have been officially accepted by an editor or publisher should be identified as "in press." Articles that have been submitted for editorial review, but have not been accepted or have been accepted subject to revision, should be identified as "submitted" or "under editorial review." Work in preparation should not be listed in the vita. Projected work or work in preparation should be reported in the candidate’s statement.

Software, multimedia presentations, films or videos, and other scholarly or creative works designed for electronic technologies should be similarly listed in one of the three categories and be designated as refereed or not. If additional explanatory information would be helpful to reviewers, this information should be provided in an appendix to the dossier. IUPUI recognizes and encourages electronic publication, but care must be taken to identify and explain the venue and to explain what procedures for peer review are in place. Electronic publication should reflect the same quality and standards as print publication.

Similarly, interdisciplinary work that appears in journals or other publication forms that may not be traditional should be listed in one of the three categories and designated as refereed or not. Additional explanatory information may be provided in an appendix to the dossier. Such work is encouraged by IUPUI, and it should be fully described to ensure that it is appreciated as peer reviewed and valuable.

NOTE: As a part of the dossier preparation, department chairs (deans where applicable) should provide an assessment of each journal, press, or other medium of publication. This requirement applies to electronic media and to interdisciplinary media. See the statement of chair’s responsibilities.

(Date) ___________________________ (Signature of Candidate) ___________________________
INDIANA UNIVERSITY-PURDUE UNIVERSITY AT INDIANAPOLIS
DEAN OF THE FACULTIES’ COMMENTS
REGARDING OUTSIDE LETTERS

Practices and procedures for obtaining outside letters of review vary among the departments and schools. External letters are required for all promotion and tenure (P&T) cases, and are expected to address teaching or performance, research and creative activities, and service, with particular attention to the candidate’s chosen area of excellence. In all instances, the relationship between the candidate and the external reviewer should be as independent as possible.

Ordinarily, chairs should solicit outside letters. However, chairs may delegate this responsibility to another member of the department, such as the chair of the primary committee, in accord with established departmental or school procedures. In most instances, the candidate should not be involved in the process of identifying external evaluators, with two exceptions: 1) the candidate should be allowed to list those he or she would definitely not want to serve as an external reviewer, and 2) the candidate may provide a list of key scholars in the field if these are not known to the chair or the chair’s designee. Generally, the candidate should not provide any outside letters. If outside letters are added by the candidate, these must be clearly designated as such and candidates should recognize that letters solicited by them do not have the same value as letters solicited by the chair or dean; candidate-solicited letters should be placed in an appendix to the dossier and they should not be forwarded for campus-level review unless they offer support for specific claims that otherwise would not be adequately documented. The value of external letters is greatly enhanced by the objectivity and credibility of the author. Care should be taken to avoid relying on persons closely affiliated with the candidate.

Please consider these points:

1. The chair (primary or unit committee chair, dean, or other person specified by department or school procedures) should request and receive these letters.

2. The solicitor should use identical letters of solicitation for all referees, and a copy of the letter that was used should be included in an appendix of the dossier. If circumstances require different letters (e.g., reviewing different areas of the candidate’s work), then copies of all letters used should be included.

3. All letters should be solicited at the same time; specifically, additional letters should not be requested following receipt of a negative evaluation. If additional letters must be sought because a referee declines, the reason should be explained.

4. Letters of solicitation must explicitly mention the candidate’s area(s) of excellence. Letters of solicitation for candidates choosing to present a balanced case must include an explanation of Indiana University’s policy on the balanced case.

5. Individual letters must be sent for each candidate; it is inappropriate to solicit external reviews for more than one candidate from a particular external reviewer in the same letter.

6. All letters solicited and received must be included in the dossier; neither the candidate nor subsequent reviewers may exclude letters.

7. Referees should be selected on the basis of their ability to comment on the candidate’s professional accomplishments.

8. Referees for professional service, teaching, and some other areas of creative or scholarly work may not necessarily hold academic appointments, but they should be selected on the basis of having an established expertise to evaluate the evidence presented to them. Letters from former students, of course, constitute a special category and should not be used. Academic referees are expected to hold at least the rank for which the candidate is being considered.

9. The dossier should contain a brief statement of professional qualifications for each referee sufficient to establish the authority of the referee in relation to the specific case under review; ordinarily, two or three sentences should suffice. Academic referees are expected to hold at least the rank to which the candidate aspires.
10. When writing to referees, include the vita, candidate’s statement, and copies of publications, including books, unless you are certain they are available to the referee. In instances in which a referee is asked to read a book-length manuscript, an honorarium should be provided.

11. Evaluators should not be asked to make a recommendation on promotion or tenure; they should be asked to evaluate the candidate's work or activities. They should not be asked to speculate on whether the candidate would receive promotion or tenure at their own institutions. The purpose for seeking these letters is to obtain an objective peer review of the work, and, hence, they should be phrased in a neutral fashion without any suggestion about the department's likely eventual recommendation.

12. To provide useful information for review beyond the department level, avoid using abbreviations that are not likely to be known to colleagues outside the field.

13. Special considerations must be given to evaluating creative work (especially when performances or exhibitions are available for a short period of time). The same degree of objectivity should be maintained in evaluating creative works as in evaluating research. In some cases, it may be necessary to invite external evaluators to campus to view works or performances even though the promotion or tenure review may be several years away.

14. Results of teaching, research and creative activity, or service disseminated through electronic media are as valuable as results published in print media. The same care and concern for objective peer assessment should be observed when reviewing such electronic publications.

15. While collaborators should ordinarily not be asked to evaluate the quality and importance of shared work, they may be asked to document the extent and nature of the candidate’s individual contributions to a team effort. Such letters should be specific about this purpose and not be confused with external letters from peers asked to evaluate the quality and impact of teaching, research and creative activity, and service.

16. Electronic letters of reference are acceptable if they have been verified.
SAMPLE LETTER TO REQUEST AN EXTERNAL EVALUATION FOR FACULTY
(Schools may develop their own letters, but they should use the same format and general content to contact all persons asked to provide evaluations)

Dear ____________________:

Professor _______________ is being considered for (promotion and/or tenure) at the rank of ________________ in the Department of _______________ within the School of ___________ at Indiana University-Purdue University Indianapolis (IUPUI). We would be particularly grateful for your comments on the significance of Professor _______________’s work and its impact in your field. To assist in this evaluation, we are providing a packet of relevant materials, including (his/her) curriculum vitae, a copy of (his/her) personal statement, and copies of selected recent publications and teaching materials.

Professor _______________ has identified (research, teaching, service) as (his/her) area of excellence and therefore this is the area where evaluation by peers is most important. [OR: Professor __________ has indicated a balanced case, which should be supported by evidence of highly satisfactory performance in all three areas, research, teaching and service, in keeping with Indiana University’s policy on balanced cases.]

If you comment on Professor _____________ ’s research, we would welcome your evaluation of the quality of the publications and journals that have been listed, as well as comments on any creative work or exhibition media. Comments on teaching might include your evaluations of course syllabi, examinations, other teaching materials, and publications on teaching, as well as any personal experience you may have of (his/her) teaching. For excellence in service, please comment on both service activities and the candidate’s scholarship of service. We would also appreciate any comments you might care to make concerning Professor _______________’s contributions to professional organizations or to (his/her) discipline through professional service activities or publications.

Please focus your review on the quality and impact of the candidate’s work. We are not asking you to recommend for or against promotion or tenure, nor are we asking if the candidate might receive promotion or tenure at your institution.

The IUPUI Promotion and Tenure Guidelines require that requested references come from individuals with no close connections to the candidate (i.e., former or current mentors, students, co-authors, research partners). Therefore, it would be helpful for us to know your relationship to the candidate: how long and under what circumstances you know (him/her), if, in fact, you do actually know (him/her). Also, to provide reviewers at the IUPUI campus level with a context for your comments, we would welcome a copy of your vita or brief biography.

We hope you understand how much we appreciate your assistance as we consider Professor _______________’s candidacy. It is important for us to understand (his/her) contributions from a perspective beyond our campus. We are aware of the time a review such as this takes, and understand it can be a difficult commitment to make, but we assure you that your help with this process is invaluable.

Although letters are not normally disclosed to candidates, an Indiana state law permits employees to access their files. While this may be of some concern for you, we sincerely hope it will not dissuade you.

In order to complete Professor _______________’s dossier for review, we would appreciate receiving your comments by _______________________. I do hope you will be able to assist us.

Sincerely,
SAMPLE LETTER TO REQUEST AN EXTERNAL EVALUATION FOR LIBRARIANS

(Schools may develop their own letters, but they should use the same format and general content to contact all persons asked to provide evaluations)

Dear ____________:

____________________ is being considered for promotion to the rank of Librarian at Indiana University-Purdue University Indianapolis (IUPUI). We would be particularly grateful for your evaluation of ____________’s contribution to and standing in the profession. To assist in this evaluation, we are providing a packet of relevant materials, including (his/her) curriculum vitae, a copy of (his/her) personal statement, and other pertinent materials.

For promotion to the rank of Librarian from Associate Librarian at IUPUI, the candidate must meet established university criteria.

Primarily: Superior performance – the candidate must show evidence of performance that is achieved by few others at IUPUI.

Secondarily: Either –
Excellence in professional development – the candidate must show a continued significant contribution at the state, regional, national, or international level.

Or –
Excellence in service – the candidate must show a continued significant contribution at the community, state, regional, national, or international level.

Tertiary: For either area not chosen as secondary, performance must be at least satisfactory.

In order to evaluate objectively the criterion of state, regional, or national recognition in the library profession, we depend heavily upon the opinions of prominent colleagues outside IUPUI who are knowledgeable in the field of specialization of the candidate. Your frank appraisal of the candidate’s contributions to the profession is very important. We are aware of the time a review such as this takes, and understand it can be a difficult commitment to make, but we assure you that your help with this process is invaluable.

Although letters are not normally disclosed to candidates, an Indiana state law permits employees to access their files. While this may be of some concern for you, we sincerely hope it will not dissuade you.

In order to complete _____________________’s dossier for review, we would appreciate receiving your comments by _______________________. I do hope you will be able to assist us.

Sincerely,
CANDIDATE REVIEW FORM

Please review the “Candidate Profile” below, review the dossier, and complete the “Review Form” section.

REVIEW SECTION

Please indicate your overall rating of the candidate for each area of service and make your recommendation for promotion and/or tenure. Note: Areas of service differ for librarians. “Performance,” for librarians, is the equivalent of “Teaching,” and “Professional Development” is the equivalent of “Research or Creative Activity.” For “All Read” cases, please omit this rating.

REVIEWER’S SUMMARY EVALUATION

Check the corresponding boxes below to indicate the aspects of teaching/performance, research and creative activity/professional development, and service about which the dossier did not contain sufficient documentation.

**Summary Evaluation of Achievement:** Provide a summary statement that addresses the principal accomplishment in the areas and evaluates strengths and weaknesses, commenting as appropriate on: clarity of goals, preparation, methodology, and self-reflection. Then, indicate whether the dossier contained adequate documentation regarding each area.
